SUMMARY

Highly experienced **SRE/Application Support Engineer** with extensive experience in managing and automating mission-critical systems across FinTech, IT, Healthcare and Entertainment domains. Proven ability to drive continuous service improvement through proactive automation and expert L2/L3 support. Proficient in leveraging Python, Shell scripting, infrastructure-as-code, CI/CD pipelines, and rigorous adherence to ITIL practices.

SKILLS

Automation / Scripting	Python, UNIX Shell, crontab, Rundeck, Control-M
Monitoring / Logging	Datadog, Kibana (ELK), Splunk
Platform / Tools	ServiceNow, BMC Remedy, JIRA, Tableau, Power BI, Knime
Cloud / DevOps	Azure (Migration Support), Terraform, Jenkins, CI/CD, Confluence
Standards / OS	ITIL (Incident, Change, Problem, Request Management), Linux/Unix, Windows

PROFESSIONAL EXPERIENCE

TAO Digital Solutions, Chennai

Technical Lead, February 2026 – April 2026

Responsibilities:

- Supported day-to-day SRE operations in a Healthcare IT environment, adhering to domain-specific
- compliance and data handling practices.
- Wrote Python scripts to automate recurring operational tasks, reducing manual effort for the team.
- Handled incident management activities including triaging, tracking, and resolving production issues in line with ITIL practices.

Citicorp Services India Private Limited, Chennai

Application Support Senior Analyst, October 2024 – September 2025

Responsibilities:

- Managed and validated stability for complex KNIME workflows, handling job scheduling and error resolution.
- Provided deployment support and troubleshooting for Appian-based applications.
- Led daily operational coordination during release windows and high-priority incidents, ensuring smooth handoffs.
- Participated in business continuity and disaster recovery (DR) planning to ensure application resilience.
- Mentored junior engineers and enhanced internal SOPs and documentation.
- Efficiently handled user service requests (access provisioning, data fetch) and adhered to ITIL practices.

PagoNxt Merchant Solutions (Formerly WIRECARD), Chennai

Senior Application Engineer, April 2020 – September 2024

Responsibilities:

- Spearheaded monitoring and alerting initiatives, reducing production incident response times by 40%.
- Engineered semi-automated deployment pipelines using Terraform and Jenkins, improving deployment speed and consistency.
- Coordinated with Data Center (DC) operations for disaster recovery testing and traffic management.
- Automated daily operational activities using Rundeck and Python scripts, improving service delivery efficiency.
- Directed deployment and release activities, applying Blue-Green deployment strategy and coordinating with release management for post-deployment validations.
- Provided L2/L3 support for Payment & Risk applications, investigating issues by analyzing API calls, database logs, and Control-M output.
- Assisted in cloud migration efforts by providing deployment assistance for key applications moving to Azure platforms.

Cognizant, Chennai

Associate – Projects, June 2014 – April 2020

Responsibilities:

- Improved system reliability by proactively monitoring critical 24x7 jobs, successfully reducing downtime incidents by 40%.
- Drove operational efficiency by implementing automation functionalities using Shell/Python scripts and scheduling crontab jobs, which reduced manual support activities by 30%.
- Recognized for innovative problem-solving skills, implementing solutions that improved operational performance by 30% and boosted team productivity by 20%.
- Conducted Root Cause Analysis (RCA) on production issues and developed new application functionalities using Python, Informix, Unix, Shell Scripting, and SQL.
- Prepared project closure documents, including weekly status, monthly status, and KPI metrics reports.
